

PREMIUM EYEWEAR FOR WATERSPORTS

The FLO is our lightweight floating model for everyday use on the water, weighing in at only 34 grams. It's the perfect eyewear solution for SUP adventures, fair-weather sailing or light-wind foiling.

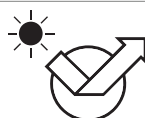

Constructed from the same robust frame material as the Typhoon and the Surge, and offered with a range of premium lenses to suit a variety of environments and weather conditions, the FLO is functional, versatile and reliable both on and off the water.

The 8-base curve radius frame closely contours the face and maximises UV protection of the eyes, while the wide and unobstructed peripheral vision will enhance awareness of the surroundings. Advanced water shedding coating technology is applied to both inner and outer surfaces of the lenses, keeping vision clear of distracting water spots.

From the Caribbean to the Antarctic, the FLO is a functional watershade with a go-anywhere attitude. Designed with light wind and low flow watersports in mind, the FLO embodies what a universal watershade should be.

Oleophobic & Hydrophobic

Anti-glare

Scratch resistant

100% UVA & B protection

FLO - KEY FEATURES

- LENSES:** Decentered injected polarized and fixed tint lenses by ZEISS and LiP Sunglasses Vivide and Levante Series are impact resistant polycarbonate and nylon with oleophobic and hydrophobic lens coatings to ensure that oils and dirt are effortlessly repelled and water droplets slide off the side of the lenses..
- FRAMES:** The frames are constructed of Grilamid TR90, a super-lightweight, strong and flexible Swiss polymer that offers shape memory and is highly impact resistant. Thanks to our FLOT8 frame technology, the FLO frame floats on the surface of the water enabling easy retrieval following a fall in the water.
- ANTI-FOG:** Models with multilayer blue mirror coating also incorporate an anti-fog coating on the inner lens surface.
