SUNGLASSES

## ABOUT LiP

Here at LiP we are committed to bringing you the very best in sunglasses technology. Our brand is the product of over 25 years of eyewear innovation and design experience. Our vision is to challenge, innovate, transform and transcend.

THE  
ULTIMATE, ESSENTIAL  
& UNIVERSAL

*Watershades*

**TYPHOON**  
THE ULTIMATE WATERSHADE

## TYPHOON and ZEISS

Our 2019 TYPHOON is fitted with de-centered injected polycarbonate (PC) or Polyamide (PA) polarized lenses by ZEISS, featuring a hydrophobic and oleophobic coating, high impact resistance, superior scratch resistance and elimination of glare for improved vision especially on water and snow.

LENSES BY

## RI-PEL™ and TRI-PEL™ Coatings

### Tri-Pel Polycarbonate (PC) lenses

ZEISS PC lenses combine the outstanding, easy to clean, oil and water repellent features of the Ri-Pel coating together with the technical performance of the Tri-Flection patented mirror series, offering an exceptionally long-lasting anti-smudge anti-scratch mirror treatment.

### Ri-Pel Polyamide (PA) Lenses

ZEISS PA lenses offer ultra-crisp and sharp vision, which when combined with a premium hard coating and the advanced 'Ri-Pel' transparent hydrophobic and oleophobic coating, delivers enhanced clarity and resolution and superior scratch resistance.

## EYE PROTECTION

Our watershades are designed not only to protect your eyes from the sun's harmful radiation but also to afford protection from impacts. The damage UV rays cause accumulates over a lifetime and can lead to irreversible consequences. High quality sunglasses lenses offer optimal protection, eliminating those risks. For impact protection, our flexible Grilamid TR90 frames absorb and spread the forces unleashed during a collision.

## HYDROPHOBIC & OLEOPHOBIC COATING

All our watershades come equipped with a durable dirt and water repellent anti-static coating, ensuring enhanced visibility through reduced lens contamination. Water, sweat, oil, dirt and dust slip off the lens surface easily. Combined with a hard anti-scratch surface coating, our watershades lenses are extremely easy to clean and protected from wear and tear.

## LENS QUALITY

Lenses are at the heart of any sunglasses and here we make no compromises, cooperating only with the best manufacturers. Our watersports lenses are constructed from either polycarbonate, polyamide or NXT. All of our lenses are developed and produced under rigorous quality control conditions and meet the following international standards.

- European Standard EN ISO 12312-1:2013/A1:2015
- American National Standard ANSI Z80.3-2018
- Australian/New Zealand Standard AS/NZS 1067.1:2016
- ANSI Z87.1-2003 (High Mass Impact Test)

## POLARIZATION

Polarized lenses strongly reduce glare by filtering out the reflected sunlight that bounces off horizontal surfaces like water or roads. While regular sunglasses only reduce the amount of light reaching the eye, polarized lenses will provide enhanced vision for unmatched clarity and comfort, especially when used on water.

Packing the functional features of the TYPHOON into a stylish and affordable package, the SURGE represents the essence of what a quality water shade needs to be, to really work, in everyday and extreme conditions.

**FLO**  
THE UNIVERSAL WATERSHADE

## INTRODUCING FLO

The FLO is a functional watershade with a go-anywhere / can-do attitude. Designed with foiling, sailing, SUP, kayak & fishing in mind, the FLO is crafted from state of the art materials and brings to life our FLOT8 technology. Versatile & reliable both on and off the water, the FLO embodies what a universal watershade should be.

Our newest watershade is unsinkable, strapless & lightweight. It's the perfect companion for SUP adventures along the coast or sailing in the Bahamas. The 8-base curve frame contours the face and cradles the head, giving crisp and unobstructed peripheral vision. With a range of lens options to suit every occasion, the FLO will protect your eyes and enhance your experience on the water, whatever your passion.

## PRESCRIPTION WATERSHADES

Configured specifically for sports use, our Watershades RX program brings a unique, scientifically-advanced category of lens material to the watersports market. Our NXT optical lenses deliver the following core benefits:

- Ultra lightweight and thin lens material
- Crisp & clear vision with optimal peripheral clarity
- High Impact resistance and superior strength

## SINGLE VISION

For near-sightedness, far-sightedness and astigmatism, our single vision lenses are the standard option for customers who want to leave their contact lenses at home. Our NXT single vision lenses can correct to power +6/-8.

## LENSES

We offer four categories of NXT lens to cater for a variety of lighting conditions and user requirements, in addition to a number of standard RX coatings. The choices are fixed tint, polarized, photochromic or polarized + photochromic.

### BASE LENS COLOURS

### MIRROR COATINGS

## VARIFOCAL

Our varifocal lenses are for people that require two prescriptions in their lenses – one for distance and one for close up work. We employ the utmost precision using state-of-the-art equipment to ensure that each lens is perfectly optimised.
